

## **SENIOR FRONT-END DEVELOPER (Energy Efficiency)**

### **DESCRIPTION**

Ensign is a company that delivers energy reduction solutions. We are unique in this space as we combine technology (Web and Native), IoT devices (we have over 20,000 IoT devices to install this year) and energy engineers all over the world.

We have a mission to reduce global greenhouse emission by 10% by 2035. We need to develop and improve our young platform to make the mission possible.

We are building a team of passionate, detail-oriented developers and engineers. Come and join us to build this world class team that will run this incredibly ambitious platform.

### **JOB SCOPE:**

We need a kickass front-end developer with proficiency with React, Redux, at least one CSS in JS library and a taste for good UX (and to constantly strive to improve it).

You will get the freedom and trust to work with autonomy from anywhere in the world. The platform we are building will have real impact.

### **WHAT WE ARE OFFERING**

- Internationally remote friendly - work from anywhere you want
- Grow your skills in state of the art technologies
- Innovative environment, out of the box thinking
- Flexible work conditions
- International travel opportunities
- Great salary or contract

### **ESSENTIAL REQUIREMENTS:**

- Bachelor's Degree in Computer Science or related field
- 3+ years' web development experience required
- 2+ years' app development experience preferred
- Proficiency with AngularJS an asset
- Strong knowledge of web development tools and programming languages

### **ADDITIONAL PREFERRED QUALIFICATIONS & EXPERIENCE:**

- Proficient in user interface design and development; JavaScript, HTML, CSS
- Commercial experience with React, Redux and Node.js

- Excellent understanding of UX/UI design principles
- Experience with build tools like Webpack
- Experience with back-end APIs (Ruby on Rails back-end is a plus)
- Experience with Progressive Web Apps, Native development or React Native is a plus

### **PERSONAL ATTRIBUTES**

- An enquiring mind
- **Exceptional** problem-solving capabilities
- Good Work Ethics
- Highly developed communication and influencing skills
- Innovative
- Willingness to learn new things and assist where they can
- A clear thinking, intelligent, articulate professional who enjoys working in a strong team environment with the ability to quickly understand systems and processes

### **WHAT YOU'LL BE DOING**

- Transforming one of our tools to a mind-blowing user experience, with lightning fast interactions
- Innovating and contributing to a platform for auditing, analysing and controlling energy consumption
- Providing technical leadership for a growing team
- Writing clean, well thought out and reliable code
- Participating as a member of a small cross functional team containing members with different skills and experience

### **CLOSING DATE:**

- Applications will close at 12h00 on 20 February 2019
- Upload a comprehensive CV and cover letter in English with traceable references, together with certified copies of your qualifications, results and ID.
- Applications must be submitted to [techjobs@ensight.solutions](mailto:techjobs@ensight.solutions)
- If you do not receive communication from us within 30 days of the closing date, please consider your application as being unsuccessful.
